Research Papers

Removal of 2′,3′-dideoxynucleotide residues from injected DNA in *Xenopus laevis* oocytes
R.J. Legerski, J.E. Penkala, C.A. Peterson and D.A. Wright (U.S.A.) 1

9-Amino-ellipticine inhibits the apurinic site-dependent base excision-repair pathway
M. Lefrançois, J.-R. Bertrand and C. Malvy (France) 9

Modification of deoxyribose-phosphate residues by extracts of ataxia telangiectasia cells
L.R. Karam, P. Calsou, W.A. Franklin, R.B. Painter, M. Olsson and T. Lindahl (Great Britain) 19

Increased UV sensitivity of *Escherichia coli* cells after introduction of foreign photolyase genes
T. Kobayashi, M. Takao, A. Oikawa and A. Yasui (Japan) 27

The role of excision repair in the removal of transient benzo[*a*]pyrene-induced DNA lesions in Chinese hamster ovary cells
D.H. Blakey and G.R. Douglas (Canada) 35

DNA breaks and repair in the mouse leukemia L1210 cells exposed to three different types of interstrand DNA cross-linkers
N. Yajima, S.-i. Hochi, N. Miyata, T. Kishi and G. Kawanishi (Japan) 43

Effect of UV light on DNA replication and chain elongation in Chinese hamster UV61 cells
T.D. Griffiths, S.A. Taft and S.Y. Ling (U.S.A.) 51

Repair of single nucleotide DNA mismatches transfected into mammalian cells can occur by short-patch excision
L.A. Heywood and J.F. Burke (Great Britain) 59

Increased sensitivity to killing by restriction enzymes in the XR-1 DNA double-strand break repair-deficient mutant
A.J. Giaccia, R.A. MacLaren, N. Denko, D. Nicolaou and T.D. Stamato (U.S.A.) 67

The repair of UV-irradiated plasmids transfected into cultured fish cells
H. Mitani, J.-I. Komura and A. Shima (Japan) 77

Expression of the cDNA for the beta subunit of human casein kinase II confers partial UV resistance on xeroderma pigmentosum cells
T. Teitz, D. Eli, M. Penner, M. Bakhanashvili, T. Naiman, T.L. Timme, C.M. Wood, R.E. Moses and D. Canaani (Israel, U.S.A.) 85

In situ (6-4)photoproduct determination by laser cytometry and autoradiography
T. Mori, T. Matsunaga, C.-C. Chang, J.E. Trosko and O. Nikaido (Japan, U.S.A.) 99

DNA repair endonuclease activity during synchronous growth of diploid human fibroblasts
W.K. Kaufmann and S.J. Wilson (U.S.A.) 107

The induction and repair of DNA damage detected by the DNA precipitation assay in Chinese hamster ovary cells treated with acridine orange + visible light
A.H. Uggla and S. Sundell-Bergman (Sweden) 119

Evidence for AP site formation related to DNA-oxygen alkylation in CHO cells treated with ethylating agents
P. Fortini, M. Bignami and E. Dogliotti (Italy) 129

Recent Advances in DNA Repair

A Report of the 1989 Meeting of the British Photobiology Society in Association with the DNA-Repair Network
A. Collins and S. Sedgwick (Great Britain) 139

Special Issue

The Enzymology of DNA Repair
edited by Errol C. Friedberg

Introduction
E.C. Friedberg (U.S.A.) 145

DNA photolyases: Physical properties, action mechanism, and roles in dark repair
G.B. Sancar (U.S.A.) 147
Structures and functions of DNA glycosylases
K. Sakumi and M. Sekiguchi (Japan) 161
The enzymology of apurinic/apyrimidinic endonucleases
P.W. Doetsch and R.P. Cunningham (U.S.A.) 173
Structure and function of the (A)BC excinuclease of *Escherichia coli*
C.P. Selby and A. Sancar (U.S.A.) 203
The UvrABC endonuclease system of *Escherichia coli* — A view from Baltimore
L. Grossman and A.T. Yeung (U.S.A.) 213
Use of in vivo and in vitro assays for the characterization of mammalian excision repair and isolation of repair proteins
J.H.J. Hoeijmakers, A.P.M. Eker, R.D. Wood and P. Robins (The Netherlands, Great Britain) 223
A critical review of permeabilized cell systems for studying mammalian DNA repair
S. Keeney and S. Linn (U.S.A.) 239
Mechanisms of DNA-mismatch correction
M. Grilley, J. Holmes, B. Yashar and P. Modrich (U.S.A.) 253
Mismatch binding proteins and tolerance to alkylating agents in human cells
P. Karran and C. Stephenson (Great Britain) 269
Eukaryotic DNA ligases
D.D. Lasko, A.E. Tomkinson and T. Lindahl (Great Britain) 277
Animal cell DNA polymerases in DNA repair
F.W. Perrino and L.A. Loeb (U.S.A.) 289
Mutation induced by DNA damage: a many protein affair
H. Echols and M.F. Goodman (U.S.A.) 301
[*end of special issue*]
